✦ 931 & 933 ARCH STREET ✦

PHILADELPHIA, PA.

Philadelphia Bellevue Institute

Of Medicine and Surgery.

Some twenty-five years ago, when my practice was increasing in the treatment of Chronic and Surgical diseases, and when patients were coming from great distances, it became necessary to secure a suitable building for their accommodation and treatment. To this end a large structure was purchased, in the western part of the city, and which was practically the origin of the Philadelphia Bellevue Institute of Medicine and Surgery. It was however, found in time, that its remoteness from the centre of the city was attended with many difficulties, and hence, in 1876 it was sold, and patients removed to more central locations. The offices of the Institute, however, were retained at 10th and Arch Streets.

Because of the impossibility of a vast number of afflicted living at great distances, to come even to so central a place as Philadelphia, a series of convenient methods were introduced, for correspondence with, and sending medicine to, the afflicted at their homes, in which tens of thousands of invalids have been successfully treated.

This is effected by the answering of a series of questions, through which we are enabled to diagnose the complaint with much accuracy, and by referring the correspondence to its special department, we are enabled to prepare and forward a suitable course of treatment, specifically adapted to each individual's diseased condition, with almost as much confidence of success as though the patient were present in the office of our Institute. In fact, of the tens of thousands of patients treated, cured and at present under treatment, not one in the hundred has ever consulted us personally at the Institute.

In the practice of medicine, as well as in the arts and sciences, and in all industries pursued by man, they instinctively incline to that which meets their approval. This is especially the case with the physician in hospital practice, in the selection of remedies, for where there are a large class of patients of the same type to be prescribed for, the physician, for convenience sake and with equal success, formulates certain remedies which cover a large field in his practice, and which by their general use, become *favorite prescriptions* or *remedies*. In this manner (through the "Institute"), many preparations have come into use, a number of which are most extensively used at present all over the country. They are not in any sense, patent medicines, but are prepared with great care, out of the very best remedies obtainable, by the best pharmaceutical skill, and with the highest degree of merit we have been able to command. They have therefore become meritoriously popular; are largely sought, and have very extensive sale all the country over.

EPILEPSY OR FALLING FITS,

Falling Sickness, Frothing Convulsions, Jerking Spasms, and all Nervous Diseases.

Of all the morbid affections to which our frail and afflicted race is subject, the most horrible and appalling in appearance, are convulsions.

These generally consist of a series of rapid and forcible contractions of the muscles, alternating with relaxation of the same,—the hands, however, are almost always clenched, the thumb, being drawn within the palm, while the arms and legs are often thrust out with such suddenness and force as to seriously injure those who may come to his or her assistance.

The violent agitation of the frame in Epileptic convulsions, attended with the horrid writhings and twistings of the body, presents an aspect of unutterable distress, while the frightful distortions and grimaces of the "human face divine," make up a scene which it is impossible for the hardest heart to witness unmoved, or even to contemplate without the most profound and heartfelt sorrow. The degree of force exerted by the convulsed muscles, constitutes a power most extraordinary, and vastly beyond the most determined will in health. Young infants, wasted invalids, and feeble women, under the influence of involuntary spasms or convulsions, draw up and extend their limbs with such force as can scarcely be resisted by the best efforts of the most robust men.

In ordinary Epileptic seizures, the patient utters a cry or silently falls to the ground, generally backwards; his eyes opened widely and vacantly, with fixed countenance, complexion pale or livid, rarely flushed. This state or stage lasts only for a moment, for convulsions come on almost immediately with horrid distortions of visage, rotation of head, clenched hands, and limbs reflexed and thrown out as before described. The

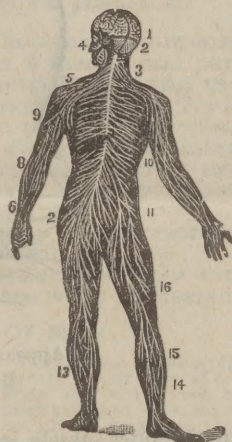

THIS MAN HAS A FIT.

tongue is frequently caught between the teeth and a bloody froth or foam gathers about the lips; the patient sometimes moans piteously or cries

out piercingly, his urine is often insensibly voided and his bowels involuntarily moved. The duration of this horrid state may last but a minute or two, or some eight, ten or fifteen minutes. No age, sex, or condition of life is free from its curse.

Epilepsy may occur soon after birth, and is met with in early childhood, at puberty, in adult as well as in advanced life.

To repeat, in confirmed Epilepsy the patient falls suddenly, without warning, losing all consciousness and sensibility, and his whole frame is violently agitated by convulsive movements, which after

The annexed diagram represents a back view of the brain and spinal cord, or great nerve and its branches, and gives a very good idea of the way in which the nerves spread and ramify throughout the body; it also shows plainly the different divisions of the back portion of the brain, the study of which is all important to the physician who undertakes the treatment of the nervous system. Figure 1, is the Cerebrum. 2. The Cerebellum, or base of the nervous system. 3. Spinal cord, showing its attachment to the Cerebellum. 4. Nerves of the face. 5. Brachial Plexus, or union of nerves from the great spinal nerve. 6, 8, 9. Nerves of the arm. 10. Those that pass under the ribs. 11. Lumbar Plexus. 12. Sacral Plexus. 13, 14, 15, 16. Nerves of the lower limbs.

Appearance of an Epileptic and his terrible Scars on Chin, Neck
Breast and Left arm from a Scald. These are frequent
occurrences with Epileptic Fit Cases.

a few minutes subside, leaving him languid, stupid, vacant and comatose. Though this is an outline of an habitual Epileptic fit, yet the reader must be impressed and made fully sensible of the fact, that sometimes and even in bad cases, we have but the premonitory symptoms present, characterized by dizziness, intense pain in the head, vertigo, confusion of ideas, and great mental depression, with or without weeping. Sometimes the patient is petulant or violent, at other times shows an unsteady gait with a disposition to hurry forwards or backwards, sometimes tormented with a roaring in the ears or flashing light before the eyes, etc. Sometimes the entire paroxysm is manifested by a mere suspension of the faculties of the mind, the patient looking fixedly, sitting rigidly or falling without being convulsed. The characteristics of this fell disease are so varied and numerous, while different patients manifest so many strange freaks and peculiarities that it is impossible to set forth the eccentricities of this protean—ever changing—disease.

The uncertainty of the occurrence of the paroxysms, convulsions or fits, causes this disease to be more dreaded than any to which we are subject; sometimes the regularity of their occurrence forms a remarkable characteristic of this formidable malady. They often come at the moment of falling asleep, in the middle of the night, or just as the patient rises in the morning; but the wretched patient is never safe. When sitting by the cheerful fire, he knows not what moment he may be thrown headlong into the blazing grate; when walking in the country or city, should he attempt to cross over to the other side of the road or street, he may fall in front of a carriage or car and helplessly be crushed; he cannot walk with safety along the banks of rivulet, lake or river, in spring-time or harvest, without being liable to fall into their waters and be drowned; he cannot, with any security, at any time ascend a height, even a ladder, or a tree to pluck some enticing fruit, without being subject to an unexpected fit, and falling, be taken up a mangled, broken corpse.

Oh! if there is a disease upon the face of the earth to be dreaded, if there is one that enlists all your sympathies for the unutterable woe that it entails, when it dethrones reason itself, the crowning glory of mankind, it is Epilepsy.

This disease most vividly represents "The Old Man of the Sea," in its inextricable grip, for its tendency is to cling to him through weal and woe till bereft of reason, and until death terminates his unutterable sufferings.

"Great Nerve Restorer!"

DR. KLINE'S Great Nerve Restorer

IS A TRULY MARVELOUS MEDICINE FOR ALL
DISEASES OF THE

Brain, Heart and Nervous System.

Its Magical Effects in the Relief and Cure of all forms of Nervousness, Nervous Debility, Nervous Prostration, Broken Down Constitution, all Irritable, Excitable and Unsteady Nervous Affections, are really miraculous.

Instantaneous Relief is Effected by the First Dose or Few Doses of the Medicine.

A NEW VIGOR IS IMPARTED TO THE ENTIRE NERVOUS SYSTEM.

This remedy acts **DIRECTLY** and **SPECIFICALLY** upon the **BRAIN**, and **NERVOUS CENTRES**; it restores lost **ACTION** of the **BRAIN**, and **VITALIZES** the **NERVOUS SYSTEM**. It is an **INFALLIBLE** remedy for **CHOREA** or **ST. VITUS' DANCE**. All spasmodic Action—Fits, Epilepsy, Falling Sickness, Nervous Choking or Smothering Spells, are instantly stopped as if by magic. Not a day passes that Dr. Kline is not receiving letters of praise and thanks from patients who have taken his Great Nerve Restorer stating that they were immediately relieved or cured by the first few doses, or by the use of the contents of the first bottle, years upon years elapsing without a return of any symptoms of Nervousness whatever.

BRAIN CONGESTION and **FULLNESS** or **RUSH** of **BLOOD** TO THE **HEAD**, are arrested at once, **Swimming** of the **Head**, **VERTIGO** and **DIZZINESS** are promptly cured. For **NERVOUS HEADACHE** and **INSOMNIA** or **NERVOUS WAKEFULNESS**, it is a **Specific**. It brings sweet repose and refreshment to the tired brain. It is particularly adapted to **NERVOUS** and **DELICATE LADIES**.

For all those despondent symptoms which occur from Nervous Debility such as Loss of Memory, Melancholia, Aversion to Society, Confusion of Ideas, Fear and Dread of Coming Danger, Sense of

Self Destruction, and all general nervousness produced by imprudence, Excesses and Indiscretion, "The Great Nerve Restorer," stands preeminently unrivalled as the only remedy that will effect an almost immediate and permanent cure, in fact, it is truly wonderful.

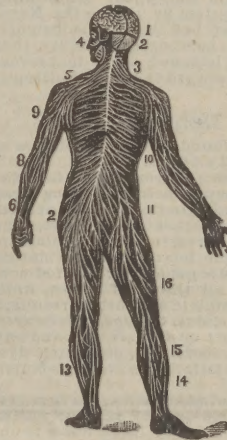

The "Great Nerve Restorer"

Has become a household name throughout the United States, Canadas and portions of foreign Countries, as being the very best Nerve Restorer extant. Try it at once, and take no bogus or so-called Nervines or Nerve Remedies, claiming to perform cures or no pay, as they are worthless and prepared only by impostors.

Physicians of repute never resort to such subterfuge to obtain practice.

A Free trial bottle invariably furnished to all new cases when requested.

NERVES OF MAN.

The annexed diagram represents a back view of the brain and spinal cord, or great nerve and its branches, and gives a very good idea of the way in which the nerves spread and ramify throughout the body; it also shows plainly the different divisions of the back portion of the brain, the study of which is all important to the physician who undertakes the treatment of the nervous system. Fig 1, is the Cerebrum. 2, The Cerebellum, or base of the nervous system. 3, Spinal cord, showing its attachment to the Cerebellum. 4, Nerves of the face. 5, Brachial Plexus, or union of nerves from the great spinal nerve. 6, 8, 9, Nerves of the arm. 10, Those that pass under the ribs. 11, Lumbar Plexus. 12, Sacral Plexus. 13, 14, 15, 16, Nerves of the lower limbs.

The Brain and Its Convulsions.

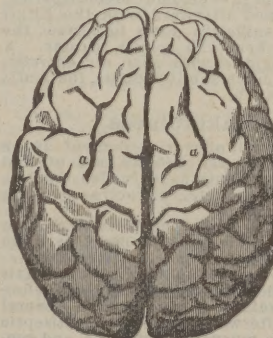

PLATE.—Uppersurface of the Brain of man, showing its subdivision by the longitudinal fissure into two lateral hemispheres, right and left, also the chief sulci and convulsions. The fissures of Rolando are the oblique fissures which commence near the middle line and proceed outwards and forwards, marking off the Frontal lobes, *a, a*, from the Parietal lobes, which lie behind those fissures. The Occipital lobes, forming the Posterior extremity of the Hemispheres, completely conceal the Cerebellum.

the Hemispheres, completely conceal the Cerebellum.

Brain Congestion.

Brain Congestion or fullness and rush of blood to the head, is due to an accumulation of blood in the veins of the brain, thus producing *Drowsiness, Stupor, Vertigo, Faintness, Spasmodic Action*, and a general depression of the different organs of the body.

Treatment.—Give immediately free action to the bowels, by taking full doses of the *Pill of Pills*; follow the action by taking the *Elixir Vitæ* or *New Life*, in sufficiently large doses to keep the bowels thoroughly opened for several days afterward. Control and quiet the Nervous System by taking the *Nerve Restorer* in sufficiently large doses after meals and at bed-time, well diluted in water. If much weakness exists, take the *Antiseptic Tonic* between meals.

Vertigo, Dizziness or Swimming of the Head.

Symptoms.—*Dizziness or Giddiness, Mental Confusion* and inability to stand without a complete loss of consciousness has a fixed, open, meaningless eye, and slight, partial convulsions, as of a hand, an arm, one of the muscles of the face, etc. If standing at the time of the attack, the patient may fall. If sitting or lying, the attack may pass by with scarcely a notice of the same. These attacks seldom last a minute, frequently continue for several weeks, gradually increasing in intensity, and at length, if not properly treated, terminating in that terrible disease, *Epilepsy*.

Treatment.—If any obstruction or derangement of the general secretions exist, the "*Elixir Vitæ*," or the "*Anti-Bilious Elixir*," or the "*Pill of Pills*" should be taken as the case may require, in sufficient quantities or doses to keep the bowels well open. Then allay nervous irritability of the system by taking the *Nerve Restorer* after meals and at bed-time in sufficiently large doses, to overcome all nervous excitability, then continue on regularly with lessened doses to prevent a return of the attacks. Afterward take the *Antiseptic Tonic* between meals.

Nervous Debility

Is to be found among all classes of people and all ages.

Symptoms.—Poor appetite, disturbed sleep, a feeling of being tired on awakening in the morning and unable to rise without great effort. The patient is perverse and irritable, constant fatigue, loss of power, premature decay, and a general prostrated condition of all the vital forces, until finally complete exhaustion results.

Causes.—*Excesses, Indiscretions, Old Age, Indulgences, Weaknesses, Chronic Affections or diseases, etc.*, and any derangement of the general secretions, producing dyspeptic symptoms. Mal Assimilation with Mal-Nutrition, etc.

Treatment.—Give tone and vigor to the nervous system by taking the "*Nerve Restorer*" regularly after meals and at bed-time, in sufficiently large doses to obtain the desired result, see general instructions. If bowels be very much constipated the "*Pill of Pills*" should be taken, sufficient to overcome the constipation, and the action maintained afterward with the *Elixir Vitæ* or *New Life*, in sufficient doses to correct the general secretions and keep the bowels regular. A diet easy of digestion, together with open air exercise, are essential. Where much debility exists, the *Antiseptic Tonic* should be taken.

Nervous Wakefulness.

This is generally the result of over excitement of the brain, *Mental Labors, General Debility*, use of and general suspension of stimulants, as tea, coffee, tobacco, joy, fear, grief, anticipation, etc., all act as exciting causes.

Treatment.—Control and quiet the Nervous System with the "*Nerve Restorer*," taken in sufficiently large doses after each meal and at bed-time, to have the desired effect and induce pleasant repose. Take the *Elixir Vitæ* or *New Life* in sufficient quantities or doses before meals to keep the bowels well open and the general secretions corrected; afterwards take the *Antiseptic Tonic* to give tone to the mucous membrane, and general system.

Nervous Headache.

The **Symptoms** are very much diversified in character. It may be confined to one small spot, over one or both eyes, one or both temples, one or both sides of the head, or diffused over the entire surface of the head. Sometimes it is fixed, sometimes changeable in its position. It may continue for an instant, or last for hours, days, or even weeks.

Causes.—Strong mental emotion, bodily fatigue, loss of appetite, sedentary habits, constipation, loss of sleep, excesses at the table, strong tea, coffee or tobacco.

Treatment.—Take the "*Elixir Vitæ* or *New Life*," or the "*Anti-Bilious Elixir*," in teaspoonful doses (more or less) before meals, or sufficient to open the bowels and to give tone and energy to the digestive organs, correct the general secretions and keep the bowels well regulated. Then, after this has been accomplished, the "*Nerve Restorer*" should be taken in teaspoonful doses (more or less), or sufficient to control the nervous system and prevent a return of an attack. During the paroxysms a teaspoonful of the "*Nerve Restorer*" should be given every one, two or three hours, until relief and sound sleep is induced. A continuation of this course of treatment is almost a sure, and permanent cure.

Morbid Vigilance and Stupor

Are a lower grade of vascular excitement, proceeding in many instances from over-excitement of the brain, frequently resulting from the use of coffee or tea, or from anxiety, reverses, etc., overloaded stomach, loss of blood and all depressing influences.

Treatment.—Take one teaspoonful of Dr. Kline's "*Great Nerve Restorer*," diluted in water, two or three times a day, and one, two or three teaspoonfuls at bed-time, or sufficient to overcome the inability to sleep. If the stomach be overloaded, take the "*Elixir Vitæ*," or the "*Anti-Bilious Elixir*," before meals in sufficiently large doses to keep the bowels well open and the general secretions corrected. If much debilitated take the *Antiseptic Tonic*.

Over-Worked Business Men,

And those with shattered or broken-down constitutions the result of close application to business confinement anxiety, care and losses.

Treatment.—The "*Nerve Restorer*" should be given in one-half teaspoonful doses, diluted in water, after each meal, or in just sufficient quantity when necessary to control and quiet the nervous system. In cases of Insomnia, or Nervous Wakefulness, one, two or three teaspoonfuls of the "*Nerve Restorer*" should be given upon retiring or sufficient to induce quiet, rest and sound sleep. The general secretions should be corrected by occasional doses of the "*Elixir Vitæ* or *New Life*." If there be much loss of appetite and general debility, the *Antiseptic Tonic* is the remedy required.

Nervous and Delicate Ladies.

The number of delicately organized ladies afflicted with some of the minor *Nervous Affections* are legion. They are to be found among those who are easily excited or irritated; debilitated by over-work or by long sickness; *Approach of Maturity, Change of Life, etc.* Uterine troubles always produce Nervousness, and continuing, they cast a shadow over the happy, cheerful household.

Treatment.—Correct the digestion, improve the appetite, relieve constipation, if existing, by taking Dr. Kline's "*Elixir Vitæ*" or "*New Life*" in prescribed doses before meals. Give full restoration to the Nervous System and quiet its functions by taking the *Nerve Restorer* in moderate doses after each meal and at bed-time, well diluted in water. If Displacements, Ulcerations, Inflammations, Congestions, Irritations, or any derangement of the Reproductive Organs or adjacent parts exist, Dr. Kline's "*Sachet de Mèdecin*," and the *Female Restorer* together with other treatments, should be resorted to. In case of much debility the *Antiseptic Tonic* should be taken.

See my work, "*Woman and Her Diseases*," imparting necessary information. Mailed on application.

Hysteria and Spasmodic Nervousness

Are Nervous disorders, largely emotional and generally of a paroxysmal character and of the most varied forms, which come rapidly and which are of uncertain duration.

Symptoms.—At the outset, signs of emotional excitement are noticed, such as smiles, tears, and irrepressible laughter, and sobs, brought about by trifling causes, which increase until violent convulsions result.

Symptoms of the paroxysms are convulsive movements of the trunk and limbs, clenched hands, beating of the breast, tearing of the hair or clothing, together with shrieks and screams, violent agitation, etc. The attack ends with tears, convulsive outbreaks of crying or laughter, and sometimes with obstinate hiccough. Occasionally the patient sinks to the floor insensible and exhausted, remaining so for a short time, recovering tired, crying, and even sometimes singing.

Causes.—Sometimes they are inherited. The female constitution is especially favorable to the attacks of these diseases, and they are very apt to occur between the ages of twelve and thirty. Sedentary habits, confinement to an impure air, vicious practices, etc., etc. The exciting causes are excessive ambition, startling sights and sounds, astounding intelligence, surprise, terror, anger, hatred or vexation, jealousy, grief, disappointment and extremes of heat and cold.

Treatment.—Restore the nervous system to its natural condition by taking the "Great Nerve Restorer" in teaspoonful doses, more or less, well diluted in water, after meals and at bed-time. Keep the bowels well open and the general secretions corrected by taking the "Elixir Vitæ" or "New Life," in teaspoonful doses, more or less, before meals. If much constipation exists, take the "Pill of Pills" in full doses at bed-time. The disordered functions of the Uterine System, if existing, should be invigorated and corrected by Dr. Kline's "Female Restorer," Antiseptic Tonic, or the Alternative Tonic, together with Dr. Kline's Sachet de Medecin and other treatments, if required.

For full particulars concerning female complaints in general see my illustrated work, "Woman and Her Diseases."

Despondency, Melancholia, Aversion to Society, Fear and Dread of Coming Danger, Sense of Self Destruction.

These are purely Nervous Conditions, in which the activity of the mental faculties (the mind) is greatly diminished or lessened.

Symptoms.—These characteristics are marked. Want of energy, lack of buoyancy, depression of spirit, sometimes leading to a suicidal tendency.

Causes.—These vary from real to imaginary losses, etc., domestic infelicities, crosses in life, sudden death of a near relative or friend, disappointments pertaining to marriage, etc.

Treatment.—First rouse the stomach and liver to increased action. Promote the appetite and stimulate the bowels by taking the "Elixir Vitæ" or the "Anti-Bilious Elixir" in teaspoonful doses, more or less, before meals. Then soothe and strengthen the nervous system by teaspoonful doses of the "Nerve Restorer" after meals, and at bed-time in somewhat larger doses.

Active open air exercise, walking, traveling, mingling in society, etc., will prove highly beneficial as an aid in the treatment.

Unpleasant Dreams, Palpitation or Fluttering of the Heart, Dots or Specks Before the Eyes.

These several different conditions most frequently arise from a morbid state of the nervous system, together with disordered digestion and derangement of the general secretions.

Causes.—Excitement, anxiety, fear, anticipation, sudden or unexpected revelations, they may also be due to the varied forms of indigestion and general derangement of the functions of the Brain and Nervous System.

Treatment.—The "Elixir Vitæ" or "New Life" should be taken in teaspoonful doses (more or less) before meals, or in just sufficient quantities or doses to

correct the general secretions of the stomach and give tone to the digestive organs. The "Nerve Restorer" should be taken after meals, in half-teaspoonful doses, or in just sufficient quantity to control and quiet the nervous system, and induce normal repose.

Sorrow.

Persons in sorrow and nervous from sudden misfortune or loss of a near and dear relative or friend, or distressed from any cause whatever, should adopt the following

Treatment.—Take the "Nerve Restorer" well diluted in water, after each meal and at bed-time, in sufficiently large doses to restore and quiet the brain and nervous power of the human system.

If any derangement of the general secretions of the stomach exist, they should be corrected by taking occasional doses of the "Elixir Vitæ" or "New Life," when necessary.

Chorea, or St. Vitus' Dance,

Is an irregular involuntary contraction of some one or more of the voluntary muscles, occasionally assuming a frightful or even fatal form. It is mainly a disease of childhood, though occasionally it begins in early adult life, and in rare instances makes its appearance in old age.

Symptoms.—The symptoms generally come on gradually. Impairment of the general health is noticed in all cases. Defective appetite, *Katid Breath*, *Inactivity of the Bowels*, *Swollen Abdomen*, *Depression of Spirits* and other signs of Nervous Disorder. Irregular muscular action of the face, hands and shoulders are first noticed, until at length the whole body becomes more or less involved. The head, trunk and extremities are almost in constant motion; the manner being a capricious and fantastic one, thus giving rise to the term, "Insanity of Muscles."

Causes.—An unsteady, excitable state of the Nervous System, together with sex, constitutes one of the chief predisposing causes. Feeble health, disordered digestion, excitability of the nervous system, and whatever tends to debilitate the system and impoverish the blood, may be considered in connection with age and sex, as denoting a Chorea condition.

Treatment.—If the bowels are constipated, take the "Elixir Vitæ" or "New Life" or the "Anti-Bilious Elixir" before meals in sufficient quantities or doses to produce several motions of the bowels daily. If the bowels fail to respond readily with the first few doses of the "Elixir" take the Pill of Pills until the desired result is accomplished, and afterwards continue with the "Elixir" in small doses, to correct the secretions, and allay all irritations. Control and quiet the spasmodic and involuntary muscular movements, by taking the "Nerve Restorer," well diluted in water, and in sufficiently large doses. If great debility exists, take the Antiseptic Tonic between meals.

Convulsions

Are spasms of the muscles, generally attended with unconsciousness.

Symptoms.—The attack may come on without warning, muscles of the body may all be affected at once, one half, or only a single limb. Average duration is from five to twenty minutes, though may last hours and even days.

Causes.—Fear, anger, surprise, sunstroke, falls or other accidents, teething, indigestion, worms, disordered state of the liver, etc.

Treatment.—During the paroxysms, place the patient where fresh and pure air can be breathed, loosen the clothing, hot water to the feet and cold water to the head. If due to worms, stomach or intestinal derangement, take the "Elixir Vitæ" or "New Life" in large doses to remove the cause. The "Nerve Restorer" should be taken in teaspoonful doses, more or less, according to age, after meals and at bed-time, to allay any tendency to spasmodic action. The diet should be nutritious and digestible.

Opium, Laudanum and Morphia Habits.

Opium eating, laudanum drinking, and hypodermic injections of morphia, are vices indeed, and terrible in their consequences. Language is too barren to describe the victim true to life.

Treatment.—The patient must determine at once to discontinue the habit. First ascertain the amount of Opium consumed per day, then commence to lessen the amount daily but guardedly; let the quantity be just appreciably lessened every one, two or three days; continue decreasing in

this manner, cautiously yet persistently, until the appetite no longer craves it. Whilst thus lessening, the "Nerve Restorer" should be taken in just sufficient quantity to maintain an influence over the nervous system, which is necessary to prevent any bad effects from reducing the quantity of opium; as the quantity of opium becomes considerably lessened, the dose of the "Nerve Restorer" should be increased correspondingly. If this plan of treatment be faithfully persevered in, a permanent cure will surely result.

Alcoholism

Is a disease confined to persons addicted to *Intemperance, Debauchery, Drunkenness, etc.*

Treatment.—The Nerve Restorer taken in large doses and frequently repeated soon gives tone and energy to the great nerves supplying the stomach, and allays the craving for stimulants. It is especially adapted for those who have been on a debauch or night's dissipation. In all these classes of cases, Dr. Kline's "Great Nerve Restorer" has no equal. Try

it at once, and take no bogus or so-called Nerve or Nerve Remedies, claiming to perform cures or no pay, as they are worthless, and prepared only by impostors.

Catalepsy

Is characterized by a complete loss of consciousness and rigidity of the muscles. It may attack a single limb or the whole body. The attack may last a few minutes, hours, or even days.

Causes.—Excitability of the nervous system, Irritation of the stomach, intestines, or of the female economy.

Treatment.—Move the bowels freely with the "Pill of Pills," taken in full doses, afterwards keep up the action of the bowels moderately by taking the "Elixir Vitæ" or "New Life." Take the "Nerve Restorer" after each meal, well diluted in water, and in sufficiently large doses to control and quiet the nervous system. If the patient be weak, pale, menstruation difficult or scanty, take Dr. Kline's "Female Restorer" in prescribed doses.

Epilepsy, Fits, Falling Sickness, Jerking Spasms, Frothing Convulsions, Choking, Smothering Spells, Nervous Spells in General.

Epilepsy is one of the most frequent of all nervous diseases. It is characterized by paroxysmal attacks of convulsions, with loss of sensibility, and unconsciousness, without fever, and usually followed by coma. It occurs in all ages and both sexes.

Symptoms.—These generally consist in a series of rapid and forcible contractions of the muscles, alternat-

ing with relaxation of the same,—the hands, however, are almost always clenched, the thumb being drawn within the palm, while the arms and legs are often thrust out with such suddenness and force as to seriously injure those who may come to his or her assistance. The duration of the attack may last from one to fifteen minutes; the first attack occurs most frequently at night during sound sleep, and in some persons only at night, nothing being known of the condition of the patient until some of the severer symptoms manifest themselves. In confirmed cases the patient falls suddenly, without warning, loses all consciousness and sensibility, and his whole frame is violently agitated by convulsive movements, which after a few minutes subside, leaving him languid, stupid, vacant and comatose. As the attacks become more frequent the Brain and Nerve functions become more and more deranged, the memory and intellectual powers become more and more enfeebled, until insanity is the inevitable result. It may take years for this to be accomplished, but frequently a few months suffice to produce the sad affliction. The general course of epilepsy is toward imbecility and impairment of the mental faculties.

Dose and Directions.—The average dose and directions for taking Dr. Kline's Great Nerve Restorer are as follows:

Nervous and Delicate Ladies.—Should take one half to one teaspoonful, more or less, after each meal, and one or two teaspoonfuls at bed-time, in a wineglassful of water, or sufficient to control the Nervous System.

Overworked Business Men.—Should take one teaspoonful after each meal, and one, two or three teaspoonfuls before retiring, or sufficient to control the Nervous System, and induce quiet, rest and sound sleep.

For Nervous and Sick Headache, Fullness of the Head, Brain Congestion, Vertigo, Dizziness, or Swimming of the Head.—Take one teaspoonful diluted in water every hour or two until relieved, and afterward three or four times a day to prevent a recurrence of an attack.

Nervous Wakefulness or Insomnia.—Take one teaspoonful diluted in water two or three times a day; and at bed-time, one, two or three teaspoonfuls, or sufficient to overcome the inability to sleep.

For Loss of Memory, Confusion of Ideas, Unpleasant Dreams, Dots or Specks before the Eyes, Palpitation of the Heart, Melancholy, Sense of Self-Destruction, and for Excesses and Indiscretions generally.—Take one teaspoonful after each meal, and one, two or three teaspoonfuls upon retiring, or sufficient to quiet the Nervous System.

For Fits, Epilepsy, Spasms or Falling Sickness, St. Vitus Dance, Nervous Spells, etc., take as follows:

Children from three to ten years of age, one-fourth to one-half teaspoonful after each meal, and medium teaspoonful at bed-time in a little water (sweetened if preferred);

Youths from ten to fifteen years of age, a small teaspoonful after each meal, and a large teaspoonful at bed-time in a wine-glassful or more of water (sweetened if preferred).

All Persons from fifteen years to adult age should take one teaspoonful more or less, after each meal, and two teaspoonfuls at bed-time, in a wine-glassful or more of water.

It should be distinctly understood that the above are the average doses, but while there are those who will not require more than half the dose, there are others again who will require two or three times the prescribed dose to quiet and control the nervous system. Patients taking or persons giving the medicine, should in all cases exercise a little judgment.

In all cases, if the tongue is white-coated, the breath bad, and if constipation exists, with occasional headache, the skin dry and husky with pimples on the face, chest and shoulders, indicating a deranged stomach, bowels and system, bad blood, etc., Dr. Kline's "Elixir Vitæ" should be taken in sufficient doses to correct the secretions, and to produce free action of the bowels daily. If great constipation exists, assist with Dr. Kline's Pill of Pills, and if there is much weakness

and debility, tone and strengthen the system with Dr. Kline's Antiseptic Tonic. All these medicines are perfectly safe.

If not eminently successful, consult Dr. Kline either by letter or in person at once.

Importance in Continuing the Treatment.

Many persons afflicted with spasmodic nerve affections or fits, imagine they are cured because their spasms have been stopped by the first dose or first day's use of my "Great Nerve Restorer" and on discontinuing the treatment, their "Spells" return: Hence the remedy is often condemned, because it has not had sufficient time to produce that direct and specific effect upon the diseased action existing in the brain and nervous system, which is absolutely essential to perfect a permanent cure. The fact of the paroxysms being stopped is only the beginning of the cure. Continue, therefore, incessantly, without missing a single dose, in order to retain the good effects obtained by the use of the first bottle.

After taking the medicine a reasonable length of time, however, and the disease is apparently overcome, the dose may be gradually lessened from time to time, at long intervals, until none remains. But while lessening the dose, do not fail to watch the symptoms closely, and should there be signs of spasmodic action manifested while thus decreasing the dose, immediately recommence with full doses of the "Nerve Restorer," and give regularly as previously directed until every vestige of disease is again overcome. An easily digestible and nutritious diet, and a healthy condition of the stomach, liver and digestion must be at all times rigidly maintained.

General Instructions.

During the "spasm" the patient should be laid on a large bed or on the floor; air is to be freely admitted around him, his head is to be raised, and his necktie (together with any other tight parts of the dress) loosened. A piece of cork or soft wood should, if possible, be placed between the teeth, to prevent injury to the tongue.

The patient should sleep on a good hard mattress, with the head well elevated, on a large firm pillow, and in a well ventilated room.

Epileptics and those afflicted with various brain and nerve diseases should avoid all business pursuits, where a stooping position is required, such as blacksmithing, gardening, trucking, scrubbing and all positions which favor an active flow of blood to the brain.

The patient should avoid all excitement; all excesses, indiscretions, dissipations, mental anxiety, high heat, over-exertion or exposure.

Should abstain entirely from the use of all stimulants, including tea, coffee, alcohol, the use of tobacco, and everything that has a depressing influence on the nervous system.

The patient's habits should be governed by good common sense. Daily open air exercise, early hours to retire, quiet occupation at home, and attention to the secretions and excretions of the body being necessary, while excessive mental excitement or exertion is, on the other hand, especially to be avoided.

He should also avoid all pursuits requiring much mental labor and excitement, as Attorneys, Physicians, Merchants, Dealers in Stocks, Theatrical Subjects, etc., and should avoid extreme exposure to the sun.

Sleep—If, while under treatment, the patient is dull, drowsy, or inclined to sleep, allow him to indulge in the desire, even if it occupies nine-tenths of his time, and do not urge him to use exertion to which he is not inclined; let him have the full benefit of all the rest and quiet he desires, as this condition is most favorable for the healing process which will surely follow under this plan of treatment. This sleepy condition, however, is not an essential effect in the treatment of Epilepsy, as very many cases are treated where no sleepiness is produced, owing to a different stage of their disease.

Instructions in Eating.

Epileptic patients and invalids, as a class, must never partake of any hog meat. No salt fish, boiled cabbage, fried meats or vegetables, rich gravies or dressings, or richly stewed oysters, chicken and lobster salads, should be eaten; while dried meats and sausages, nuts of all kinds, whether made up in candies or

otherwise; cakes, pies and all forms of pastry or any irritating substances that are difficult of digestion must be studiously avoided.

Avoid late suppers, dissipation, irregular habits of living, and abandon all vices, all excesses, indiscretions, and over-indulgences of every species.

Epileptic Fits are noticed to be quite frequent in some cases during the night; these without doubt are often caused by hearty suppers, heavy or indigestible food; for when the functions of animal life are in repose, the organic nervous centres undoubtedly require increased excitability, and are consequently more readily thrown into irregular and violent activity by the irritant influence, which indigestible or a superabundance of food produces. Epileptics must therefore be especially careful what they eat and how much they eat. Their meals should be between 6 and 7 A.M., 12 and 1 noon, and a light supper not later than 6 o'clock.

The following diet for epileptic and nervous patients should be strictly adhered to.

Boiled, stewed, baked or roasted meats and vegetables, (excepting cabbage, egg plant, and some lower order of vegetables) in moderate quantities are not injurious. Plain puddings of corn starch, rice, tapioca, and sago, ripe fruits well masticated, hominy, wheat grits, oatmeal porridge, cracked wheat, milk, soft boiled eggs, and all other plain nutritious and easily digested foods can be partaken of in such quantities as the appetite reasonably craves and the stomach will tolerate.

Send for my Work on "Dietetics," or "What Shall I Eat?"

A \$2.00 trial bottle of my "Great Nerve Restorer" will be sent free to every new case of Fits or Falling Sickness on the explicit terms, that the express charges will be paid on the box when received, and if any perceptible benefit is derived from the use of the trial bottle, they will then be willing to continue in the treatment, according to directions, until a permanent cure, if possible, is effected. Patients in writing for a free \$2.00 trial bottle of my "Great Nerve Restorer," will avoid delay in receiving the same by stating the fact that they will be pleased to comply with these conditions.

How many bottles of your Nerve Restorer will it require to effect a cure?

This query is brought to my notice daily, in correspondence with my patients. To all these I will say that it is impossible to state accurately the amount of medicine necessary to effect a cure in each and every individual case. A reasonable length of time is requisite in all cases to remove the diseased action existing in the brain and nervous system, which time naturally varies in accordance with the extent of the disease, applications that may exist or arise during treatment and the absence of assurance that my directions for treatment, medicinal, hygienic, dietetic or other advice will be faithfully followed. Many patients are cured with one bottle, a great many with a few bottles, whilst there are others, and especially those of a complicated character, that may require months or even years to overcome their nervous troubles.

Ordering Medicine.

After receiving the "Trial Bottle," and using a portion of its contents, it is advisable to send for more, in order that the patient may not be without the medicine, and thus retain the advantage obtained by an uninterrupted course of treatment.

When ordering it is not economy to send for a single bottle from any distance, especially from any great distance, as the express charges on one bottle are nearly as great as upon half a dozen bottles. Again, by ordering six bottles, you pay only Ten Dollars thus saving two dollars by purchasing in quantity; or send \$5.00 for three two dollar bottles, and save \$1.00 and proportionately less expense on transportation.

Persons ordering one or more of my medicines sent to them, should be particular in writing the full Name, Post-Office and nearest Express Office plainly, so as to avoid all errors and delay in receiving their medicine promptly.

Caution.—Beware of daring and unblushing frauds, who claim to cure Fits, Epilepsy, etc.—no cure, no pay, return money, etc. Send for their credentials. Be sure a physician is prescribing for you, and do not be deceived by the boastful promises of impostors, who are not physicians, and have no claim whatever on the profession. Mark them and beware of them.

FEMALE DEPARTMENT

OF THE

PHILADELPHIA BELLEVUE INSTITUTE OF MEDICINE AND SURGERY,

931 & 933 ARCH ST., PHILADELPHIA, PA.

It shall be the constant aim of the Principal, under all circumstances, in continuance of the Institute, to make it everything that may be required of it for the pleasure and successful treatment of the afflicted as in years gone by. Skilled Physicians and Surgeons, assisted by experienced Nurses, are constantly at hand, and no pains shall be spared to make this the first place of the kind in the country for the successful treatment of all forms of Medical and Surgical Diseases.

Special attention paid to all Medical and Surgical Diseases of Women.

Invalids of every form in advanced stages of disease, should not fail to avail themselves of the advantages of this Institute.

For the convenience and benefit of those whose circumstances and conditions in life forbid their going to any place of cure, and who also can have medicine successfully sent to them, I have arranged the following list of questions, which if properly answered, will enable me to send medicine to them with every confidence of success. Please, therefore, fill out the list fully and return to me, and I can by return mail tell you the proper course to pursue and very nearly what it will cost for a course of Medicine. If more convenient write with a pencil.

QUESTIONS TO BE ANSWERED.

1. Name?.....
2. Post Office?.....
3. County?.....
4. State?.....
5. Nearest Express Office?.....
6. What is your Age?.....
7. Weight?.....
8. Occupation?.....
9. Married?.....
10. If married, how long?.....
11. How many children?.....
12. Have you nursed your children?.....
13. Spare or Fleshy?.....
14. Troubled with headache?.....
15. Is the pain mostly in the "top of the head"?.....
16. Have you pain in the back?.....
17. Or hips and down the thighs?.....
18. Is the pain or distress of a bearing down character?.....
19. Is it much worse when on your feet?.....
20. Do you feel more discomfort towards evening than upon rising in the morning?.....
21. Are you regular in your monthly periods?.....
22. Are they attended with pain?.....
23. Are they excessive or scanty?.....
24. What is their color or appearance?.....
25. How long does the flow continue?.....
26. Have you any flooding?.....
27. Are you nervous?.....
28. Hysterical symptoms at any time?.....
29. Have you fits?.....
30. Any spasms or convulsions?.....
31. Vertigo or swimming in the head?.....
32. Have you leucorrhœa?.....
33. Any itching or burning or soreness externally?.....
34. Is going upstairs fatiguing or distressing?.....
35. Have you pain in your limbs?.....
36. Do you notice any swelling of the feet or ankles, late in the day or at any time?.....
37. Any pain in voiding urine?.....
38. If pregnant how long?.....
39. Soreness over womb?.....
40. Falling of the womb?.....
41. Any miscarriages?.....
42. Ever indulge in excessive venery?.....
43. Had any private disease?.....
44. Ever any secret indulgences?.....
45. Is appetite good?.....
46. Condition of bowels?.....
47. Ever stated your ailment to me?.....
48. If so, when?.....

Any peculiarity of the case, its history or course, suggested to the mind of the patient should be stated in correspondence. Please write fully and confidentially, resting assured that all correspondence is entirely private, and is treated with the greatest degree of respect.

If afflicted, please answer the above questions fully, no matter how unimportant they may seem to you, and tear off the page and return to me; by so doing I can arrive at the nature of the case and treat it intelligently.

Address in plain hand, PHILADELPHIA BELLEVUE INSTITUTE, Nos. 931 & 933 Arch St., Philadelphia, Pa.

THE PHILADELPHIA Bellevue Institute of Medicine and Surgery,

Nos. 931 and 933 ARCH STREET, PHILADELPHIA, PA.

Philadelphia has long been noted for being one of the first places in America for its Medical Colleges and of world-wide authority for *scientific medical research*.

The Philadelphia Bellevue Institute is also distinguished for its *remarkable and wonderful cures of surgical and other formidable diseases of a truly desperate nature*, and hence has become national in its character: patients coming from all portions of the United States, the Canadas and even portions of *foreign countries* for treatment. So widely has it become known for its advantages in healing the sick, that there is not a State in the Union, but that gladly bears testimony of great cures performed at this Institute.

As it is more pleasant to give than to receive and as we are enjoined to "Do unto others as we would have them do unto us," and as it costs nothing I trust that you will take pleasure in filling out the space on the following page as indicated, with *ALL THE NAMES YOU CAN, OF THOSE WHO ARE AFFLICTED*, and return the same to me.

Be careful to write plainly the Name of the person, the Post Office, County, State and kind of disease with such remarks opposite each case as you may think necessary for information; by so doing, you may make a sad heart happy, and be the means of doing much good. You will observe that the list of diseases on this page are numbered 1, 2, 3, etc. Now, if you will put the numbers respectively as the diseases are numbered opposite the names of the diseased persons, you will at once indicate to me the character of their difficulties, and aid me without inconvenience to properly register their cases; For example, if you should know of several cases of Consumption, mark them all No. 9; or of several cases of Diseased Liver, mark them all No. 15, etc., etc.

I will not appeal, however, alone to your magnanimity in affording relief to suffering humanity, but as a special inducement, upon the reception of your list, if you desire it, I will send you, free of charge, postage prepaid, my work on Dietetics, or "What shall I Eat,"—Price 25 cents, or my illustrated Treatise on Diseases of the Brain and Nervous System (40 pages), as it may please you. Please fill the blank on second page with the names of those whom you may know to be really afflicted, worthy and responsible.

NOTE.—Such communications are strictly confidential; your name is not referred to, in addressing those afflicted whose names you may kindly send me. All communications are answered in sealed envelope, without advertising matter displayed thereon.

Address all communications, in strict confidence to, P. O. Box 1066, Philadelphia, Pa.

TREATING PATIENTS AT THEIR HOMES.

It is always better to have the advantages of a careful personal examination of patients, especially in complicated forms of disease, or of a surgical nature; but there are many who cannot come from great distances to Philadelphia for the purpose of consultation, to say nothing of the inconvenience of remaining long from home, or of long delay for treatment; and hence the necessity of the most *perfect plan possible for their treatment at home.*

Such are the improvements and facilities for the diagnosis of disease and treatment of patients at their homes at present, that I am enabled to prepare and forward suitable remedies, specifically adapted to all curable diseased conditions, with almost as much confidence of success as though I had the patient before me in my Office or Institute. In fact, of the thousands upon thousands of patients treated, cured and under treatment at the present time, not one in hundreds has ever been at my Office or Institute or have consulted me in person. The physician determines the nature of the disease by the symptoms and history of the case, as, for example, if we receive a severe blow on the head, there may be sickness, nausea and vomiting; if the stomach is deranged, the head will ache; if the liver is diseased, there may be a pain in the shoulder; a pain in the great toe indicates gout; certain peculiar sounds indicate certain diseases of the heart and lungs; and also certain well defined symptoms, as pain in back, limbs, etc., indicate diseases peculiar to the female sex; and thus I might enumerate symptoms indefinitely. In the same way we know the remedies, by their having certain specific influences over certain parts of the body, as, for example, belladonna and gelsemium on the eye, asclepin on the pleura, veratrum on the heart and arteries, opium and other agents on the nerves, aloes on the lower bowel, sulphur and arsenic on the skin, uva-ursi on the kidneys; and thus, too, I might continue on until I had exhausted the Materia Medica. By thus possessing the true knowledge of diseases and their remedies, we apply the remedies adapted to the diseased conditions.

To assist the afflicted, therefore, in corresponding with me in relation to their difficulties, they will please answer correctly the questions in this list, always stating age, sex, occupation, habits and general condition of the functions of the body; and at the same time give me such other information of their cases as they may have bearing specially upon the subject. By so doing I will be able to determine the nature of the case, and can, by return mail, tell them the proper course to pursue, and very nearly what it will cost them for treatment.

Please answer the above questions fully, no matter how unimportant they may seem to you, and tear off the page and return to me; by so doing I can arrive at the true nature of the case and treat it intelligently.

VOLUNTARY TESTIMONIALS.

In Consideration of the amount of letters continually coming from all parts of the country, the Canadas, etc., such as those contained in this sheet, it is but fair to believe that no other MEDICINAL PREPARATION has ever received the ENCOMIUMS and PRAISE as DR. KLINE'S GREAT NERVE RESTORER, which is such a prominent feature in his treatment of Epilepsy and Nervous Disease. Please read as follows:

"Two Bottles Of Your Nerve Restorer Has Made A Permanent Cure."

FRANCISCO, STOKES CO., N. C., Sept. 30th, 1889.

DR. R. H. KLINE—Dear Sir: I was afflicted with Epilepsy for 18 years, brought on by a gun-shot wound received at Gettysburg, Pa., 1863. I tried all the medical aid that could be had, without any relief, and paid out hundreds of dollars. Two bottles of your Great Nerve Restorer I consider have made a permanent cure. I was so much relieved by taking one bottle of your medicine that I was able to represent my County in the Legislature of 1889. Now I want to say to all suffering humanity, that is afflicted with any nervous affection, that Dr. Kline's Great Nerve Restorer is no humbug. I honestly believe that his medicine taken according to directions will effect a permanent cure.

Respectfully,

JAMES A. LEAKE.

"I Am Enjoying Good Health."

BASSETT, NEB., Sept. 28th, 1889.

R. H. KLINE, M. D.—Dear Sir: "In answer to yours of the 9th, I would say that I return many thanks, and hope you may be blessed with good health and success. I am enjoying good health, and have had no symptoms of fits since using your world-renowned Great Nerve Restorer. Before using your medicine I had from three to five fits a day."

Very truly your friend,

MARY J. RICHARDS.

"Your Remedy is Wonderful And Its Value Unknown."

LAMBERTA, BALDWIN CO., ALA., Sept. 7th, 1889.

PROF. R. H. KLINE, M. D.—Dear Sir: "I will give you my praises in behalf of your Great Nerve Restorer. I received only a trial bottle, which has done me more good than any medicine I ever took. I think it has made a final cure of me. Your remedy is wonderful and its value unknown. I am sure I was not able to make a support for my family until I took your Great Nerve Restorer, and now I am able to do my daily labor. Wishing you success, I remain,

Yours truly,

GABRIEL A. JONES.

"Entirely Well By Using Four Bottles."

ANDERSON, S. C., Sept. 20th, 1889.

R. H. KLINE, M. D.—Sir: "After taking four bottles of your medicine I have become entirely well, and I feel safe in saying that your Great Nerve Restorer is the best medicine that I ever used."

Yours truly,

GABE RICE.

"I Am Writing Just My Feelings."

EAST FLORENCE, N. Y., Sept. 18th, 1889.

DR. R. H. KLINE,—Dear Sir: "I received your Great Nerve Restorer all right and began taking it according to directions, and to-day I feel like a new-born child. God knows I can't express to you the kindness you have done for me; it puts me in mind of reading when Christ was on earth and healing the sick, and what you have done for me is the next step to His. I am writing just my feelings. I was taken with fits five years ago, and inside of twenty-four hours I had some eighty fits, and the doctors said I was the only man who ever lived and had so many, and more said the same thing, and I can prove it by fifty people here in East Florence. Since I have taken your Great Nerve Restorer, I have not had one of those feelings. I feel bright and sleep as good as I ever did. I can't recommend your medicine high enough."

Yours truly,

CHARLES J. COATES.

"And I Have Received Entire Satisfaction."

CLAYTON, WIS., July 27th, 1889.

PROF. R. H. KLINE, M. D.—Dear Sir: "My praise of your wonderful medicine can't be too high. I have received entire satisfaction from your medicine, being now entirely cured. I shall let all know of its merits who are in my reach."

Very respectfully,

OLE ENGWELL.

"Two Bottles Completely Cured Me."

RANDOLPH, MISS., July 10th, 1889.

R. H. KLINE, M. D.—Dear Sir: "I write you this to let you know how much good your Great Nerve Restorer has done for me. I was having spasms regularly, and to you I owe my life. I am very thankful to you for your remedy, and I shall always recommend and feel thankful to you for it."

Yours respectfully,

MRS. IRA STOVALL.

N. B.—I only used two \$2.00 bottles, which completely cured me.

"I Think It Almost Miraculous."

KNOX CITY, MO., July 23rd, 1889.

DR. R. H. KLINE—Dear Sir: "We think our darling boy is well again. We gave him a trial bottle of your Great Nerve Restorer, and also a \$2.00 bottle, but long before the \$2.00 bottle was gone his fits had stopped. He could neither walk nor talk when we first sent to you as a last resort, thinking there was nothing but idiocy left for our bright boy, but thank God it has cured him, for long before the second bottle was taken he could walk,

talk and run as fast as ever. The 30th of May was the last one he had and no sign of any more. Oh, doctor, can you imagine our joy at his recovery after four doctors failing utterly, and telling us there was no hope for him? I think it almost miraculous."

Very respectfully,

MRS. G. W. SMITH.

"It Has Cured Me Of Fits."

HOLLIS, KAN., Aug. 11th, 1889.

DR. R. H. KLINE—Dear Sir: "I received a bottle of your Nerve Restorer from a lady friend, who gave it to me to try. It cured me of fits. I have not felt the slightest symptom since. I will always feel grateful to you, and if my case ever needs further attention, you will be the one I will go to for assistance."

Yours truly,

IDA DOUGHERTY.

"I Cannot Too Highly Recommend It."

KANSAS CITY, Mo., Feb. 15th, 1889.

DR. R. H. KLINE—Dear Sir: "Your trial bottle of Great Nerve Restorer was duly received a few days ago, and I must make a statement to the effect that it has done me a great deal of good. I believe it prevented me from having fainting spells or epileptic fits. It has given me refreshing sleep, and in fact it has done me a great deal of good. I cannot too highly recommend it to fellow sufferers, and I am ever so thankful for the trial bottle you sent me. I have just bought a \$2.00 bottle of the druggist I trade with. I want all those afflicted to try and see what it will do for them."

Respectfully yours,

JOHN B. STRICKLAND.

1219 Holmes street.

"No Fits for Over A Year."

NORTH LINDALE, OHIO, Feb. 27th, 1889.

PROF. R. H. KLINE, M. D.—Dear Sir: "Result of taking your Great Nerve Restorer is satisfactory, as I think my son is entirely cured. Has had no fits for over a year."

Yours very respectfully,

C. KRAUTER.

"Has Had No Fits For Three Years."

NEW HAVEN, HURON Co., OHIO, June 21st, 1889.

DR. R. H. KLINE—Dear Sir: "I have great faith in your Great Nerve Restorer, for you cured my daughter of fits. It has been about three years since she had any. She seems to be perfectly well and healthy. I cannot tell you how thankful I am. I shall always recommend your Great Nerve Restorer."

R. C. SNYDER.

"It Cured Him Of Fits."

BELLEFONTE, PA., March 26th, 1889.

DR. R. H. KLINE—Dear Sir: "I received the trial bottle of your Great Nerve Restorer which you sent me, and gave it according to directions. It cured him of fits. He has had no fits since. He used to have as high as three to five per day. I can cheerfully recommend your Great Nerve Restorer to all the sufferers in the world."

Very truly,

ALBERT LYONS.

"The Greatest Remedy On Earth."

NORWICH, CT., Oct. 6th, 1889.

DR. R. H. KLINE—Dear Sir: "I write you saying, it is now five months since my daughter had a spell. Has not had one since taking your Great Nerve Restorer, and I think she is cured. I am only giving about half the prescribed dose. She is now on her seventh bottle. I can safely say to any afflicted with fits, that Dr. Kline's Great Nerve Restorer is the greatest remedy on earth. With kind wishes and every success, I am, kind friend,"

Very truly yours,

32 Sherman street.

MRS. B. COONEY.

"Cured After 32 Years' Suffering."

GALLATIN, DAVIES Co., Mo., Sept. 29th, 1889.

R. H. KLINE, M. D.—Dear Sir: "I write this letter to discharge a duty I conceive I owe to you and my fellow-men. I will inform you that your Great Nerve Restorer has been the instrument in the hands of an All-wise Providence in curing me of fits or falling sickness. I suffered with this dreadful disease 32 years. I cannot express all the joy and gratitude which I owe to you. I took six bottles of your Great Nerve Restorer. I am satisfied that I am cured. I have not had a fit for six months. I feel that I am clear of them entirely. I tried doctors in Kentucky, Indiana and Missouri, for which I received no benefit. I want my friends in all those States to know that I am cured. I advise all similarly afflicted to take your Great Nerve Restorer."

Yours very truly

JOHN P. WEST.

"Beats The World For Nervous Diseases."

SPRING LAKE, MICH., Sept. 23d, 1889.

DR. R. H. KLINE—Dear Doctor: "Replying to your favor, I will say that the trial bottle of your Great Nerve Restorer that you sent me did me more good than all the medicines I ever took. I can say that the Nerve Restorer beats the world for nervous diseases. When I commenced to take your medicine I could hardly hold a spoon in my hand. I am now well, and anything I can do for you I will do it with pleasure."

Yours truly,

C. J. GRANQUIST.

"Marvelous Cure of Our Little Boy."

MONROE, N. C., Sept. 29th, 1889.

DR. R. H. KLINE—Dear Sir: "I feel that I would not be doing justice to you or to suffering humanity, and return to the thanks of my wife and self in the marvelous cure of our little boy by the use of your valuable medicine Great Nerve Restorer, which has cured him of spasms, when other medical aid had failed and all pronounced him incurable. He is now well and stout; able to work all the time; has had no spasms for more than two years. I feel very grateful to you, and thank God that I was fortunate in obtaining your valuable medicine in the wonderful cure of my child, and heartily recommend it to all who are similarly afflicted. With best wishes for a long and happy life, I am,

"Your friend,"

JOHN A. POLK.

"Has Acted Like A Charm On Me."

NEW ERA, LA., Aug. 18th, 1889.

DR. R. H. KLINE—Dear Sir, I would say that your Great Nerve Restorer has acted like a charm on me,

and has done all that is claimed for it. I have not had a spell of Epilepsy since the first dose I took, which has been about four months ago. I have been afflicted about a period of four years and been under several physicians' hands, with no change or relief whatever. If desired I can get all my neighbors to testify to the same, who knew of my disease. I will answer all letters of inquiry in regard to your Great Nerve Restorer. I can purchase your medicine from Messrs. Finlay & Brunswick, of New Orleans, La., which saves me express charges. Trusting to see the above in print, I remain, with great thanks to Dr. Kline,

Very truly yours,

A. T. LANIUS.

"Put New Life in My Son."

So. NORWALK, CONN., Sept. 1st, 1889.

R. H. KLINE, M.D.—Dear Sir: It affords me pleasure to testify to the many virtues of your Great Nerve Restorer, as I believe it has been the means in the hands of God of restoring my son to health. I was persuaded by a friend to try your Great Nerve Restorer, and I thank God I did so; for I can honestly say it has put new life in my son. I hope you will spread the news broadcast, so that it may reach others afflicted as my son was, as I feel confident they will receive a permanent cure by using your Great Nerve Restorer.

Respectfully yours,

JAMES F. KNAPP.

4 Clay street.

What the Rev. C. M. Simmons, of Scottsboro, Ala., has to say:

Dr. R. H. KLINE—Dear Sir: I feel gratified, after having used one trial bottle of your Great Nerve Restorer, to say that I have been greatly relieved by its use, and can say to the public or to those afflicted with Epilepsy or falling sickness, that your medicine will do all that it is recommended to do. I know of another case, who told me that he has been relieved after one week's use of your Nerve Restorer.

I remain, your servant, with true respect,

REV. C. M. SIMMONS.

September 29, 1889.

"Best Medicine For Fits In The World."

RIVERTON, BOLIVAR CO., MISS., Aug. 3rd, 1889.

Dr. R. H. KLINE—Dear Sir: I am a well man and all right, and so inform the world, that your Great Nerve Restorer is the best remedy for fits in the world, and may God bless Dr. R. H. Kline and save him in Heaven at the last day.

Yours truly,

LEVI GRIMES.

What the Rev. M. P. Banks, of North Topeka, Kan., says:

SEPTEMBER 11th, 1889.

Prof. R. H. KLINE, M.D.—Dear Sir: Your medicine did just what you recommended it to do. After using your Nerve Restorer according to directions, I am completely renovated from all the complaints I suffered, and I feel like I did in the early days of my life.

Yours truly,

REV. M. P. BANKS.

Druggist's Testimonial.

LEBANON, TENN., Aug. 26th, 1889.

DR. R. H. KLINE—Dear Sir: We feel it due you to let you know the result of our advertising your remedies and also the satisfaction they have given. We have ordered them several times from Nashville wholesale druggist. We have just received a large invoice of your Nerve Restorer from Nashville. It is giving splendid satisfaction, and we have a physician in our store who is prescribing it.

Yours very truly,

S. M. ANDERSON & SON.

"My Granddaughter Is Well."

RICHFIELD, OTSEGO CO., N. Y., Aug. 17th, 1889.

DR. R. H. KLINE—Dear Sir: In reply to your very welcome letter, I would say that my granddaughter is well. She has taken three bottles of Nerve Restorer, and has one bottle left. She has not had a fit or symptom since she has been taking the medicine. She has not taken any medicine in about two months and feels just as well. We hope she is cured. We both send thanks to you for the benefit it has done her.

Yours very truly,

MRS. P. P. ACKLER.

"Nervous Disease Cured When All Other Remedies Failed."

MERKEL, TEX., Aug. 4th, 1889.

DR. R. H. KLINE—Dear Sir: I am happy to inform you that I am well and in better health than I have been for five years, and this is all due to your Great Nerve Restorer. I shall always feel very grateful to you for your great remedy, and will recommend it to the afflicted whenever I may meet them.

Yours very truly,

C. M. WILSON.

LATER, AUGUST 19th, 1889.

Dear Sir:—I am still in the enjoyment of the best of health, and nothing but your Nerve Restorer has cured me of a nervous disease when all other remedies had failed.

Very respectfully,

C. M. WILSON.

"Cured By The Use Of Three Bottles of Your Great Nerve Restorer."

NO. CHESTER, HAMPTON CO., MASS., Aug. 3rd, 1889.

DR. R. H. KLINE—Dear Sir: I am still well pleased with the effect of your Great Nerve Restorer. My brother has had no return of fits. I am indeed willing and anxious that you should publish this in your next treatise, that after trying several different doctors and medicines for my brother, and after giving up that he could be helped, he has been entirely cured of fits by the use of three bottles of your Great Nerve Restorer. I shall recommend its use to every one I hear of that is afflicted with Epilepsy, for I think it is a wonderful medicine, and you have my most heartfelt thanks.

MISS LILLIAN SMITH.

Physician's Testimonial.

SMITHFIELD, UTAH, July 11th, 1889.

DR. R. H. KLINE—Dear Doctor: This is to certify that I have used Dr. Kline's Great Nerve Restorer in my practice and find it the only sure cure for fits. I have used it with the most satisfactory results.

Yours respectfully,

C. CHRISTIANSEN, M. D.

"Accept A Father's And A Mother's Thanks."

HARRISBURG, TEXAS, Sept. 4th, 1889.

R. H. KLINE, M. D.—Dear Sir: "The two bottles of Nerve Restorer and two bottles of Tonic just received, for which accept thanks. On the 12th of May I received a trial bottle of Nerve Restorer, and at that time it took three grown people to give my son a dose of medicine, a drink of water or feed him. He could not walk or talk, and since that time have given him five bottles of your Great Nerve Restorer, and to-day, as God is my witness, he can walk and talk as good as any child ten years of age. At this time there are no signs of St. Vitus' Dance about him. When we began giving him your Great Nerve Restorer the doctors that were attending him said there was no hope for him, he must die. I had three doctors treating the little fellow, and they all pronounced you a fraud and an impostor; but to-day they see their mistake. I consider my son sound and well, for which accept a father's and a mother's thanks and best wishes, and rest assured that I will do all I can in the sale of your Great Medicine, and in case of sickness I will remember where and how to get relief."

Yours truly,

C. SCHULZE.

"Best Medicine I Ever Saw."

LAMBERTA, BALDWIN Co., ALA., Sept. 27th, 1889.

R. H. KLINE, M. D.—Dear Sir: "I received a trial bottle of your Great Nerve Restorer, which I have taken, and can say with honor, it has done me more good than any medicine I ever took. I have not had those burning spells through my head, nor the hot blushes through my body, since I took the first dose of your great and wonderful remedy. I can say with pleasure that it is the best medicine I ever saw. I feel very thankful to you and hope you will succeed in your practice. I had not been able to attend to my household affairs until I took your medicine, and since then I have moved from Mobile county to Baldwin county with all ease and pleasure.

Yours respectfully,

MRS. M. J. MOORE.

"A Case of Saint Vitus' Dance Cured."

CONCORD, N. C., June 2d, 1889.

R. H. KLINE, M. D.—Dear Sir: Some time ago my wife was taken with a nervous affection. I had two doctors to examine her, and they pronounced it Saint Vitus' Dance, and gave me a prescription to get filled. I began giving it to her, and she gradually grew worse, I was advised to write to you by a friend. I did so, and from the first bottle of your "Great Nerve Restorer" I saw she was improving, and the third bottle cured her sound and well. She is to-day in good health. I can highly recommend your "Great Nerve Restorer" to all afflicted persons.

Very truly yours,

C. L. FORCHES.

"The Most Skillful Physicians Failed."

DRUMMETT'S CREEK, MITCHELL Co., N. C., Oct., 1888.

DR. R. H. KLINE—Dear Sir: It is with pleasure that I can bear testimony to one more cure of a dreadful case of Epilepsy. My little boy who was afflicted with epilepsy for over two years, and was under the treatment of the most skilled physicians of that disease in the

country, but grew worse. I at last sent for a trial bottle of your Great Nerve Restorer. Having obtained it with thanks, I told my wife, in order to test its merits not to give a single dose until the child was attacked with a spasm. At length the attack came; it was as severe as I saw. I immediately administered the first dose of your Great Nerve Restorer, and to the great surprise of all who stood around him the medicine stayed off that fit. I continued with the use of the medicine up to the present day, and with great thanks to the Doctor and our Great Creator my child has not had a fit since the first dose. I am very well satisfied that the boy is cured, and would recommend Dr. R. H. Kline's Great Nerve Restorer to all who are suffering with that dreadful disease epilepsy. Believing and almost knowing it to be a sure and speedy cure for fits I feel it my duty, though it cost me two cents, but if it should cost \$5, I would feel obligated to do the same. You can give this to the public if you like.

Your friend,

REV. SAMUEL D. TIPTON.

"Splendid Testimonial."

SHINY OAK, EAST LAND Co., TEX., Oct. 29th, 1889.

R. H. KLINE, M. D.—Dear Sir: "I received your medicine all right and used a part of your Throat and Lung Cure. I will say on my honor, that it was a success beyond my expectations. I was preaching day and night when I received it, and nearly past speaking. After following your directions, I began to mend, and I soon got so as to speak clear; all irritation of the lungs gave way. I gave one ounce to Elder F. P. McNeesley who was about exhausted, and it did him likewise. So I have and will continue to recommend your Throat and Lung Cure, as I feel it will do just what it is recommended. I remain,"

Yours very truly,

REV. J. A. HOFFMAN.

"Dr. Kline's Great Nerve Restorer."

BERRYVILLE, ARK., July 2d, 1889.

PROF. R. H. KLINE, M. D.—Dear Sir: "I have been waiting to be thoroughly satisfied in regard to the effect your Great Nerve Restorer had on our girl. We are happy to tell you that she has not had the least symptom of a fit since we commenced your treatment. She has taken but two bottles; one trial bottle and one \$2.00 bottle. I will cheerfully certify, under the County Clerk's seal, to the benefit we have derived from your Great Nerve Restorer. I enclose \$2.00 for another bottle of your valuable medicine."

Yours truly,

M. SUSSKY.

"I Count Your Medicine Above All Others."

MARION, VA., Oct. 26th, 1889.

DR. R. H. KLINE—Dear Sir: "My son, W. C. Killinger, is well, the boy you treated with your Great Nerve Restorer. He is sound and well, and has not taken any medicine but yours, and is now sound and hearty. I am much obliged, Doctor, for your medicine. I think he is cured, and count your medicine above all others for that dread disease, epilepsy."

Yours, etc.,

G. W. KILLINGER.

THE FOLLOWING LIST

EMBRACES SOME OF THE

Leading Remedies

—OR—

FAVORITE PRESCRIPTIONS

OF THE

Philadelphia Bellevue Institute

OF MEDICINE AND SURGERY.

"Great Nerve Restorer."

Great Nerve Restorer is a standard remedy for Epilepsy, Convulsions, Dizziness, Fainting Spells, Rush of Blood to the Head, Vertigo, Nervous Headache, Insomnia or Nervous Wakefulness, Depression of Spirits, Fear and Dread of Coming Danger, Sense of Self-Destruction, Loss of Memory, Melancholia, Hysteria, Chorea or St. Vitus Dance, Ecstasy, Catalepsy, Somnambulism (Sleep Walking), Palpitation or Fluttering of Heart, the Smothering or Choking Spells, Confusion of Ideas, Opium Eating, Laudanum Drinking, Alcoholism, &c., and all despondent symptoms resulting from Overwork, Excesses, Indulgences, Imprudences, Indiscretions, &c. It is prompt, sure and safe in its action, nearly always, and as if by magic, arresting all Fits, Epilepsy, Irritable, Excitable and Unsteady Nervous Affections, by first day's use of the medicine. A trial is conviction. No delicately organized nervous system should ever be without it.

Price \$1.00 and \$2.00 per bottle.

Elixir Vitæ or New Life.

This Great Life Renewer should be used either alone or in conjunction with the Antiseptic Tonic for General Debility, Broken down Constitutions, Depression of Spirits, Emaciation, Weaknesses of either sex, Feeling of being Tired and Worried, Loss of Appetite, Bad Breath, Sour or Bitter Taste, Coated Tongue, Foul Stomach, Water Brash, Heartburn, Pain after Eating with Sense of Fullness in the Stomach, Sympathetic pain over the region of the Heart, Indigestion or Dyspepsia in any of its various forms, Liver Derangements, Jaundice, Biliousness, Sallow Skin, Bilious Headache, Constipation, Ulcerations, Inflammations, Congestions, Derangement of the Heart, Kidney Diseases, and Diseases peculiar to the Female Economy, when there is a lack of proper action. It infuses newness of life, vigor, action and vitality to the system in general, correcting the same, and thereby removing diseased action if begun, and preventing its continuance if beginning. It is, indeed, a great "Life Renewer," vitalizing the entire system, giving it new life and imparting sound health to every tissue of the body. Every household should have it, as they have other necessities of life. Physicians use it extensively.

Price \$1.00 per bottle.

Antiseptic Tonic.

Antiseptic Tonic is a powerful remedy, combining the properties of a Tonic, Antiseptic and Antiperiodic. Possessing the power, as it does of increasing the tonicity of the muscular fibres when relaxed, and the vigor of the body when weakened by disease, it can be more effectually used in such cases than any remedy of which we have any knowledge. It is especially valuable in functional disorders of the digestive organs, and in convalescence from acute diseases. It is a valuable restorer of the blood in low forms of fevers, and in low grades of disease. By increasing the functions of nutrition, its influence is especially observable in chronic diseases of a wasting character, particularly in Consumption, Scrofula, Anæmia, etc. It prevents a tendency to molecular decay, and breaking down of the system; cures malaria, loss of vitality, flabbiness of the muscular system, inactive action, and enfeebled conditions of the mucous membranes of the body. It is invaluable, in conjunction with the Elixir Vitæ, where there is a white or silvery coated tongue, with bad breath, gaseous or flatulent condition of the bowels, with chronic diarrhoea, listlessness, inability to perform any duty, perversion of the general secretions, emaciation, and gradual decay with general exhaustion. It arouses the entire system to increased health and activity, replacing the waste, which is constantly occurring, with new and healthy material; and invigorating and giving tone to the body in general.

Price \$1.00 per bottle.

Female Restorer.

This compound is truly what its name implies it to be, a general restorative medicine for women. It is especially prepared to meet her wants, and to restore her to health, when broken down by the various diseases peculiar to her organization. It is indispensable in many cases, as an assistant to the *Sachet de Medecin*, in the treatment of various forms of displacements, and diseased conditions, which cause many women to lead lives of untold misery and suffering induced by obscure troubles that may have been long existing, and that often escape the notice of the attending physician. It restores women to health, however shattered their constitution may have been, and is used with great success in conjunction with the *Sachet* in all such cases as Prolapsus of the Uterus, Ulcerations, Irritations, Inflammations, Congestions, Leucorrhœa, Amenorrhœa, Dysmenorrhœa, Menorrhagia, etc.

Price \$1.00 per bottle.

Female Injection Solution

Is especially prepared to meet the requirements of a very large class of diseased conditions peculiar to women, and for the purposes it is intended, it has proved to be a most valuable medicine, used alone or with the *Sachet*. It should be constantly in the possession of every lady, not only for the treatment of disease, but for the sake of cleanliness and prevention of disease. It is put up in powder form, is easily prepared for use, and can be conveniently sent by mail.

Price 50 cents per package.

Sachet de Medecin.

The object and end for which pessaries were introduced into medical practice having never been fully obtained, Dr. Kline, after a long and arduous practice in the treatment of *medical and surgical diseases of woman*, and having had from necessity to institute many experiments with a view of perfecting an agent or instrument to fill the indications required in treatment, now puts forth a claim to the invention of a medicated pessary, under the name and trade mark of "Sachet de Medecin," to meet this great desideratum.

This Sachet or sack pessary, is void of the objections incident to all others, and, unlike all others, it is not only mechanical or supporting in its actions, but is therapeutical or medical in its effect. In the first place it exerts a mechanical support to the prolapsed womb and appendages, and in the second place, it imparts a medicinal power and tonicity to relaxed ti-ues and ligaments, allays irritations, inflammations, congestions and heals up all ulcerations, wounds, or abrasions of the female organs, by the solvent and healing action of the medicinal articles with which it is composed.

The form of the Sachet embraces the compressed annular disc or ring shape, spheroidal or globular, and oblong or cylindrical, so as to meet the requirements of every possible case.

With reference to full particulars, send for my illustrated work, "Woman and Her Diseases."

"Anti Bilious Elixir and Blood Purifier"

We recommend this "Great Health Restorer" for all Liver, Stomach, Intestinal, Kidney and Sympathetic Heart Derangements, Sour Stomach, Bad Breath, Heartburn, Water Brash, Eructations, Headache, Indigestion and Colics and Cramps arising therefrom. It gives vigorous appetite, healthy digestion, active liver, and free secretions of the kidneys and bowels. For Blood Diseases, Constitutional Cancer, Scrofula, Tumors, Ulcers, Enlarged Joints and Bones, Salt Rheum, Tetters, Skin Diseases, and all impure affections of either sex, it is highly recommended. It is a great Anti-Dyspeptic, Liver Corrector and Blood Purifier.

Price \$1.00 per bottle.

"Throat and Lung Cure."

This great **Throat and Lung Cure** is a speedy cure for Coughs, Colds, Hoarseness, Sore Throat, Loss of Voice, Quinsy, Croup, Whooping Cough, Clergyman's Sore Throat, Influenza, Catarrh, Bronchial Consumption, Bronchitis, Asthma, Laryngitis, Difficulty of Breathing or Expectoration, Incipient Consumption, Hemorrhages and all Diseases of the Throat, Lungs and Air Passages generally. It is especially recommended to Clergymen, Public Speakers, Singers, Professionals, &c., who are in the habit of using the vocal organs spasmodically and excessively, producing debility and exhaustion of the parts. It produces no sickness, is pleasant to take and exceedingly efficacious in its results. Trial bottle free. Try it.

Price \$1.00 per bottle.

"Bon Ton Skin Bath."

Bon Ton Skin Bath is not a stain, paint or enamel, to clog the pores, and hinder nature's action, but it is a detergent or purifier of the skin. It radically cures

Pimples, Blotches, Freckles, Sun and Wind Tan, Skin Worms, Black Heads, Rashes, Pustules, Tetters, Salt Rheum, Falling of the Hair, Dandruff, Scalp Diseases, Scaly Affections, thickening of the Skin and all Eruptions and Skin Diseases, by destroying and removing quickly, the poisonous, worn out and decomposed material, which obstructs the pores and produces diseased conditions. If used according to directions it purifies the skin, imparts a roseate hue to the complexion, and, in short, is the fountain of Perpetual Beauty.

Price 50 cents and \$1.00 per bottle.

Neuralgia and Rheumatic Specific

Is a *prompt and positive relief and cure* for all forms of Painful, Nervous and Muscular Affections, as Neuralgia, Rheumatism, Sciatica, Wry Neck, Pleurodynia, Lumbago, Tic Douloureux and all painful affections of the Nervous and Muscular System, wherever located.

Price \$1.00 per bottle.

Alterative Tonic

Is a **Great Blood Purifier and Strength Renewer**. It cures Serofula, Incipient Consumption, Secondary Syphilis, Old Sores, Enlarged Glands or Joints, White Swellings, Goitre, Tumors, Ulcers, Cancerous Affections, Debility, Nervous Affections, Dropsy and Dropsical Swellings, Skin Diseases, Ulcerations of the Throat, Ear and Womb, Constitutional Disorders, and all Diseases arising from a depraved, impure and imperfect state of the blood or other circulating fluids of the body. It is a good general tonic; it gives tone, energy, vigor and strength, to the system generally, and is useful in all cases of debility. For Ovarian Enlargements and Internal Tumors, and Ulcerations, it is nearer a specific than any other known remedy. It is especially made to cure the above very large class of diseases, largely depending upon a vitiated condition of the blood, that can only be controlled by a most powerful Alterative Tonic of a compound character.

Price \$1.00 per bottle.

Pill of Pills. The "Ne Plus Ultra" of Purgative Medicines.

They cure Headaches, Bad Breath, Furred Tongue, Bad Taste in the Mouth, Foul Stomach, Indigestion or Dyspepsia, Biliousness, Jaundice, Torpid Liver, Malaria, Constipation, Pain in Stomach or Bowels, Worms, Piles. They remove all obstructions, irregularities, irritations and unhealthy secretions.

Price 25 cents per box.

All Healing Solution

Is highly recommended as a dressing for all Surgical Operations, Cuts, Wounds, Ulcers, Old Sores, Sore Eyes, Weakness of the Eyes, Inflammation of the Eyes, Granulated Eye Lids or for any purpose of Granulating or Healing, this Solution is without a rival. For Cleansing, Healing and Curing all that class of disease peculiar to the organs of generation of either sex, and for all deranged and irritated conditions of the mucous membrane it has no equal.

Price 25 cents per package.

Catarrh Specific.

For the cure of Cold in the Head, Catarrh of the Nose, Chronic Catarrhal Affections, Influenza, Catarrhal Laryngitis, Bronchial Catarrh, Bronchial Consumption, and all Catarrhal Inflammations of the Air Passages. This remedy, used with Dr. Kline's Atomizer, or Inhaler, soon heals the inflamed and ulcerated surfaces, gives tone to the membranes, allays the irritation, and frees the passages of all abnormal accumulations.

For full particulars send for Circular on Catarrh.

Price \$1.00 per bottle.

Unguentum Flavum. Yellow Ointment.

This Ointment is indispensable in the treatment of severe and obstinate diseases of the skin, particularly when attended with large elevated, red, angry looking pimples, as met with in epileptic cases, and in young ladies, and young men, at and after puberty. The Bon Ton Skin Bath should be used in conjunction with it—one assisting the other. These two remedies combined are a specific for all those unsightly skin affections, as Pimples, Blotches, Rashes, Pustules, Tetters, Salt Rheum and Skin Diseases of the worst forms generally. Take the Elixir Vitæ or New Life internally.

Price 50 cents per box.

Universal Liniment.

A Sure, Safe and Certain Remedy for Rheumatism, Neuralgia, Gout, Lumbago, Sciatica, Soreness of the Chest and Back, Quinsy, Sore Throat, Bruises, Pains Swellings, Sprains, Toothaches, Earaches and Aches and Pains wherever located. This Liniment is alike beneficial to both man and beast.

Price \$1.00 per bottle.

All information required in relation to the treatment of the most difficult forms of diseases and their complications, resisting ordinary treatment, can be obtained by sending to, or by making personal application at Dr. Kline's Office, Consulting Rooms, or, *Dispensary of the Philadelphia Bellevue Institute of Medicine and Surgery*. Consultations at the Dispensary free. Particular Specialties—Nervous Diseases, Diseases of Ladies, Diseases of the Lungs, Catarrh, Skin Diseases, Operative Surgery, Cancer and Abnormal Growths.

PROF. R. H. KLINE, M. D.,
931 Arch Street, Philadelphia, Pa.

In ordering Medicines it is always advisable to write full name, post-office and nearest express office, PLAINLY, and thus avoid delay in receiving the same promptly. Send the names of those whom you may know to be afflicted that I may correspond with them, with a view of restoring them to health. In many instances medicines are sent free for trial.

NOTE.—HOW TO SEND MONEY.—Remit P. O. Money Order, Draft, or Check (made payable to me), if you can produce either, otherwise in United States funds by Registered Letter, taking Postmaster's receipt therefor. Your Postmaster can furnish all necessary information.

"No Shake For Six Years."

ALTOONA, PA., June 26th, 1889.

DR. KLINE—Dear Sir: "I desire to send you this testimonial of what your Nerve Restorer has done for my family. Three years ago my wife was so afflicted with Nervous, Muscular, and Brain troubles, as to rob life of its charms. Indeed, had it not been for the deep love she cherished for her little family, death would have been a great relief. Upon the least excitement, a violent jerking of the muscles of the lower limbs would begin, causing her whole body to shake beyond control. If by bathing and rubbing it was forced to leave that part of the body, it immediately sought the upper parts of the body. The jaws, head, and fingers were affected in the same way by it. Sometimes in the midnight hour in midwinter, I would have to spring from my bed and make a fire with all possible haste, to procure hot water for bathing purposes, and hot drinks. Her tongue would become stiff, and her teeth chatter so terribly that it was almost impossible to get medicine into her mouth. At other times it would confine itself to her head, and roll it from side to side at will. Then it would take one finger separately, and close and unclosethe violently, and would not leave until it had passed over the entire body. I secured what I considered the best medical talent available, only to be told after a series of experiments, that the physician in charge could not cure her. I would not despair, because I believed that a remedy existed if it could only be found. At times she would seem better, but we were always in dread, for the most trifling excitement, such as the calling of a friend, the slightest grief, or a hearty laugh, was the signal for the distressing work to begin. It would often continue for several hours, after which she would be very much prostrated. I was at a great loss to know what to do for relief, when, thank God, a friend (I know not who) sent me your circular. I read it carefully, sent for a trial bottle, and began its use with such happy results, that after the first dose she was able to withstand the most severe shocks without being affected in the least. She continued its use for more than a year, and to this day she has never had a "shake."

I keep it constantly on hand, and I tell you the truth when I say, that I would not do without your Great Nerve Restorer in the family if it cost \$10 per bottle. I might have written sooner, but I wanted to test its lasting effects, and now that I am fully convinced of its merits, I send you this testimonial, which you are at liberty to use in full or in part, as you may desire. To those who are obliged to labor very hard, either mentally or physically, and are often too tired to rest, I cannot recommend it too highly. I do not believe that there is a case of Fits or Nervous trouble of any kind that it will not control, if used according to directions.

You are at liberty to refer to me at any time on this subject."

Yours most truly,

P. D. AURANDT.
1311 19th Avenue.

LATER, Aug. 19, 1889.

DR. KLINE—Dear Sir: "I am happy to say that my wife has not had a "shake" since she took the first dose of your Great Nerve Restorer six years ago. I have recommended it to others who have been benefited by its use."

P. D. AURANDT.

WOMAN

HER DISEASES AND THEIR TREATMENT.

As the treatment of diseases peculiar to ladies, surgical and otherwise, has for many years been a prominent part of the Institute practice, it is with much confidence that we would say to that very large class of sufferers, that they can, under the care of the Philadelphia Bellevue Institute, receive a course of treatment more thorough and successful than can be obtained from any other source or in any other institute with which we are acquainted.

We would especially call the attention of suffering woman to this department of the Institute, for the treatment of diseases peculiar to her organization, where the latest and most approved methods are in use.

The medicated Sachet de Medecin for the treatment of many diseases of ladies, is without a rival; it is both medicinal and mechanical. By its use a steady and continued course of medication as well as mechanical support is readily obtained, and by its use too, very many forms of diseased conditions can be overcome, which have heretofore been practically incurable. Other forms of treatment of great merit and in daily use, are peculiar features of our Institute practice, and which go very far by way of insuring the success of the Institute treatment. But there is a large class who need direct, daily care and attention, and whose circumstances render it impossible for them to have the necessary daily care of their family physician; or to come to the Institute for Professional services; to all those, we wish to say, in nearly all instances arrangements can be made so that ladies can treat themselves at home, and that too without even a personal examination, or having the services of a physician. No hesitation or fear need be anticipated, as hundreds of ladies can testify to their complete recovery from a multitudinous train of evil incident upon uterine troubles, by treating themselves at their own homes.

A question list enumerating the important points connected with female diseases can be sent them, which if answered fully and in detail, will give us an opportunity of arriving at the true nature of the case, and enable us to formulate and send a course of treatment, with almost as much confidence of success as though they were here in the Institute.

For method of using and size generally used, would refer you to Illustrated book—"Woman; her diseases and their treatment," 72 pages.

[Voluntary statement of Mrs. Maria McKee, 108 Broadway,
Camden, N. J.]

For many years I was confined more or less to bed, and for months at a time I was not able to rise. The womb, a part of the bladder and bowel, continued to prolapse or descend, until finally they fell outward from the external orifice in a mass as large as a quart measure and reached nearly to my knees. On the right side of the womb was a deep, open ulcer, about two inches in diameter and half an inch deep, which was prone to bleed at times till my clothing was saturated with blood. When able to be on my feet, I was often obliged to lie down upon my back, and push this large mass upwards and inwards for temporary relief, as best I could; but it would soon fall down again. I used all kinds of pessaries, instruments, supporters, braces and bandages, recommended by the best physicians in the city, until I exhausted their patience and skill, kept my husband bankrupt, and myself completely discouraged. In this condition and at this time, I heard of Dr. Kline's new treatment for these cases, and also of remarkable cures having been made by him, and was induced by a lady friend who had been successfully treated to call upon him. I visited the Doctor early in December, 1876, and made known to him my condition. My case was such an unusual and aggravated one that special treatment had to be prepared, and I was obliged to return again on the 13th. The Doctor, being prepared with an extra large sachet, replaced the womb, and having adjusted the same, I arose to my feet—the womb remaining in place—and, to my astonishment I could walk almost as well as ever. Leaving the office—Tenth and Arch streets—and feeling so well, I thought I would walk a little way, and continued to do so to Second and Callowhill streets, to see a sick friend; from there to Market Street Ferries, and from the landing on the opposite side of the river to my home; making in all seventeen squares, or one and three-quarter miles. On the next day—the 14th—and on the 16th, I called to see the Doctor, when he removed the sachet and re-applied the same, and my womb has not been out since. I can now walk and exercise freely; am free from pain, and feel like another woman. I can scarcely realize my changed condition, for it seems more like a dream than a reality. My husband says it is a miracle. In one word I am cured, and return thanks to my heavenly Father and Dr. Kline daily for the blessing of restored health.

A Brief Extract From a Biographical Sketch

OF

PROF. R. H. KLINE, M. D.

Commencing the practice of medicine in the usual way as taught in the University of which he was a graduate, he was soon called to treat several cases of a Malignant Surgical character, and becoming deeply interested in them, he at once commenced their special study, and spent several years of indefatigable toil in their earnest investigation; visiting cases in remote sections, to see and learn, if possible, from any and all sources their true nature and prospect of cure. Several years and many thousands of dollars were thus expended, that he might avail himself of each and every kind of treatment in vogue, as well as hunt up the most rare, extreme and difficult cases, in order to test the value of different treatments by personal experiment.

In 1865, he again returned to Philadelphia, and purchased the buildings, Nos. 931 and 933 Arch Street, where he has since resided. Some time thereafter, he became connected with the Clinical Department of the Philadelphia University; and whilst the renown previously obtained for Surgery and Special Treatment were fully appreciated, the Trustees of the College during the Winter of 1866 and 1867 created a new Professional Chair—that of malignant diseases, and elected the Doctor to fill it. From this period his practice in the treatment of Special Surgical Diseases increased, and he was compelled to call to his aid several Physicians of distinction. A large building was secured adjacent to his office for the accommodation of patients, and yet more room was demanded than could conveniently be obtained. This want of accommodation caused the Doctor to purchase in 1871, at Sixty-fifth and Vine Streets, a large and magnificent structure, which he, with his accustomed energy, soon fitted up with some sixty (60) beds, and in less than a year all were occupied by patients from Nova Scotia to Texas. One of his houses on Arch Street was subsequently turned into an Infirmary, which, with the former, called the Philadelphia Bellevue Institute, afforded shelter and accommodation for his constantly increasing practice.

In the Spring of 1872 he recognized the need of a Medical Journal, to give the busy practitioner, in city and country, a full digest of the progress of medicine in a concise and practical form; so calling the writer to aid him, a Prospectus was issued, and the first number appeared May 1st, which was an eight-page folio semi-monthly journal, under the title of "The Medical Independent." This was one of the Pioneers of One Dollar Monthly Medical Journals which, like the original, have become so popular and numerous at the present day. In consideration, however, of sickness and other unavoidable circumstances, it was thought best to suspend temporarily the publication of "The Independent," as well as other duties which were weighing the Doctor down, and injuring his health.

On the 22d of January, 1875, the Doctor was notified by the Secretary of the Board of Trustees of the Philadelphia University that he had been elected to fill the Chair of Surgery, made vacant by the resignation of Prof. Washington J. Duffey, an eminent Teacher and Surgeon of the day. This appointment he accepted, and filled creditably to the satisfaction of both Colleagues and Students. Not long afterwards Dr. Kline felt the necessity of a different course of treatment to meet the wants of a very large class of female patients, and thus invented the *Sachet de Medicin*, which also was patented in 1877. At the same time he published a neat little Monograph on "Woman and Her Diseases," in order to call attention to the new process of treatment, and its superiority over others then in use. This treatment has been a boon to a very large class of suffering women, and had Dr. Kline contributed nothing else to the Profession, or had achieved no other honors or emoluments in his long life of eminent professional services, this invention alone would be honor and glory enough for one professional man.

For several years past Dr. Kline has abandoned the duties pertaining to the general practitioner; has, so far as the treatment of acute diseases is concerned, retired, and is now devoting his time almost exclusively to a large and almost constantly increasing office practice, embracing as specialties Nervous Diseases, or those connected with the Brain and Nervous System, Medical and Surgical Diseases of Women, Diseases of the Lungs and Air Passages, Cancer and its kindred relations, and Surgery in general, chronic and long standing affections.

In the meantime, however, he has published some excellent illustrated Treatises, among which is one on Diseases of the Brain and Nervous System, which embraces a brief, clear and concise review of the pathology and treatment of that terrible disease, Epilepsy, Fits, or Falling Sickness, together with its concomitants. His long and successful experience in the treatment of that class of affections, has brought so many Testimonials and Encomiums that it should be noted in this sketch. Patients who have had scores of fits in 24 hours have been restored to health through his professional ability, as a Specialist in this direction. Another work on "Dietetics," which he has entitled "What Shall I Eat?" is preserving of a careful perusal; Essay on Cutaneous and Eruptive Diseases, Treatise on Malignant Growths, Cancer, Tumors, Ulcers, etc.

He also recently published an illustrated work of 72 pages, the title of which is "Woman and Her Diseases and Their Treatment." He is now engaged, and in fact has nearly completed, a work under the same title, of some 500 pages, which will be seen to be the most complete, concise and perfect work of the kind ever written upon this subject.

At this writing he is daily engaged in attending to a large Office Practice in his elegant apartments, 931 and 933 Arch Street, conscientiously endeavoring to Heal the Sick and Comfort the Afflicted, though in the meanwhile frequently called to distant parts to have his Professional Opinion of various extreme forms of Malignant Diseases, especially such as pertain to the Art of Surgery—an Opinion considered by those familiar with his ability as being Decisive and Indisputable. While thus professionally engaged, Dr. Kline also finds necessary time to engage in superintending the duties involved and attached to his large Laboratory, where a number of Medical Agents are produced, and which also have attained Extensive Notoriety.

Deeming the above brief sketch due to one who has thus worthily builded himself up, as well as to the Public, who are entitled to know his Antecedents, and as he stands to-day, I subscribe myself His and the Public's Friend and Servant,

ABRAM LIVEZEY, A. M., M. D.
